

Containers

The screenshot shows a software interface for managing a video playlist. At the top, there's a header with 'Master Test > Playlist' and a search bar containing 'New playlist (1)'. A 'Draft' button is visible in the top right. Below the header is a table with columns for 'Content', 'Position', 'Timing', and 'Duration'. A context menu is open over the 'Content' column, showing options: 'Add media', 'Add list', and 'Add layout'. The table contains several rows representing different elements:

Content	Position	Timing	Duration
TOTAL	F:Cover	D:10	128.4
Layout			128.4
Sky	A:L0,W200,T0,H150		128.4
1 Macropix1920x1080.mp4			45.4
2 352x704_1.mp4			25.6
3 192x160.mp4			57.4
Roma	A:L200,W400,T0,B0		45.4
4 Macropix1920x1080.mp4			45.4
List	A:L0,W200,T150,B0		0.0
Layout			0.0

Playlist items can be of two types: **media** and **containers**.

Containers

- **Layout:** a tool used to divide the video window into different areas.
- **List:** allows you to divide the playlist into multiple containers to keep it better organized.
