Omnibus Intro

Macropix “Omnibus” is a digital signage software platform designed to play video files and images, fully meeting the requirements of any LED installation.

It is versatile, intuitive, and continuously evolving thanks to the commitment of the Macropix software engineering team. Omnibus is suitable for all types of LED and LCD digital signage applications.

From the **Home** page, you can monitor the status of every online station (player), update their content and scheduling, and access additional information such as log files, screenshots, system specifications, operating system details, brightness levels, and more.
